Schools / Institutes which will also be involved in teaching part of the programme:

- School of Biological & Behavioural Sciences
- School of Physical and Chemical Sciences
- School of Languages, Linguistics & Film

Collaborative institution(s) / organisation(s) involved in delivering the programme:

Programme outline

The FdCert International Science and Engineering Foundation Programme (ISEFP Electronic Engineering) provides an alternative route onto a range of Electronic Engineering undergraduate degrees. QMUL offers tailored pathways for subjects across science and engineering.

Our ISEFP Electronic Engineering is open to international students and face-to-face sessions are taught entirely at the Mile End campus by university staff. In-line with Queen Mary's 2030 Strategy, high quality learning resources and interactive sessions with academic staff will be available online. As a foundation student, you have access to all QMUL's facilities and will be a full-time student of the university.

Highlights:
Programme Title: International Science and Engineering Foundation (Electronic Engineering)

- Opportunity to apply to Electronic Engineering undergraduate degrees after completing the Foundation year at the appropriate level
- Study at campus-based university within easy reach of all of London’s attractions
- Full access to all student facilities (academic, welfare, IT, library, social and sport)
- Experienced and well-qualified teaching staff, many of whom teach on undergraduate and postgraduate programmes

Aims of the programme

The ISEFP Electronic Engineering will equip you with the skills and knowledge to undertake an undergraduate degree in Electronic Engineering. Successful completion of this programme at the appropriate level guarantees you a place on one of the following programmes upon successful application through UCAS:
BEng Electrical and Electronic Engineering (H600, H602)
BEng Electronic Engineering (H610, H611)
BEng Computer Systems Engineering (H162, H163)
BEng Robotics Engineering (H67A, H673)

What will you be expected to achieve?

- Pass 105 credits including SEF030 Communication in Science and Technology and SEF041 Mathematics B.
- Achieve an overall average of 55%
- For progression onto particular programmes there may be additional requirements. Please check the handbook or contact fedu@qmul.ac.uk for more information.

Please note that the following information is only applicable to students who commenced their Level 4 studies in 2017/18, or 2018/19

In each year of undergraduate study, students are required to study modules to the value of at least 10 credits, which align to one or more of the following themes:

- networking
- multi- and inter-disciplinarity
- international perspectives
- enterprising perspectives.

These modules will be identified through the Module Directory, and / or by your School or Institute as your studies progress.

Academic Content:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>

</thead>
<tbody>
<tr>
<td>A 1</td>
<td>Mathematical topics such as algebra, functions, geometry and trigonometry, and an introduction to the techniques of calculus.</td>
</tr>
<tr>
<td>A 2</td>
<td>Understanding of key networks concepts, including principles of communication and structure of the internet.</td>
</tr>
</tbody>
</table>
Programme Title: International Science and Engineering Foundation (Electronic Engineering)

A3 Introduce logic gates in combinatorial and simple sequential circuits, and specification techniques including truth tables, Boolean algebra, timing diagrams and state machines.

A4 Electrical circuits. Understand and apply Ohms law $R = \frac{V}{I}$; calculate the combined resistance of series and parallel resistors; understand and apply formulae to calculate the power dissipated in a circuit.

Disciplinary Skills - able to:

B1 to have a good understanding of A-level mathematical techniques and their usage in solving problems.

B2 to develop an understanding of a variety of concepts of the physical world.

B3 be able to use mathematical formulae to do elementary calculations and interpret the outcomes in a physical context.

B4 to present data in reports in a readily-assimilated fashion, and in accord with scientific conventions.

Attributes:

C1 • To grasp the principles and practices of their field of study

C2 • To produce analyses which are grounded in evidence

C3 • To apply their analytical skills to investigate unfamiliar problems

C4 • To work individually and in collaboration with others

C5 • To develop a strong sense of intellectual integrity

C6 • To acquire substantial bodies of new knowledge

How will you learn?

Independent study
For every hour spent at university you will be expected to complete additional hours of independent study. Your individual study time could be spent preparing for, or following up on formal study sessions; reading; and revising for examinations. The direction of your individual study will be guided by the formal module structure and taught sessions you attend, along with your reading and assignments. However, we expect you to demonstrate an active role in your own learning by reading widely and expanding your own knowledge, understanding and critical ability. Independent study will foster in you the ability to identify your own learning needs and determine which areas you need to focus on to become proficient in your subject area. This is an important transferable skill and will help to prepare you for the transition to working life.

How will you be assessed?

To pass a module, you must achieve an overall mark of 40% or above. The overall mark in most modules is based on your performance in both the examination and coursework, the weighting of these two components varies per module.
Programme Title: International Science and Engineering Foundation (Electronic Engineering)

How is the programme structured?
Please specify the structure of the programme diets for all variants of the programme (e.g. full-time, part-time - if applicable). The description should be sufficiently detailed to fully define the structure of the diet.

Structure
The programme structure outlined below is indicative of what you will study. It may change slightly from year to year as new topics are introduced and after we have listened to current student feedback on teaching.

You will take 8 modules in total over two semesters, starting in September.

Year Long Modules
Compulsory:
SEF041 Mathematics B

Semester 1
Compulsory
SEF005 Physics – Mechanics and Materials
SEF034 Computing

Based on your IELTS score, either:
SEF030A Communication in Science & Technology or
SEF009 English 1

Semester 2
Only for those who take SEF009 in Semester 1:
SEF030B Communication in Science & Technology (CST)

Compulsory
SEF035 Digital Electronics and Computer Systems
SEF007 Physics – Electricity and Atomic Physics

Additional Elective option if taking SEF030 in Semester A:
SEF006 Physics - Fields and Waves

**What are the entry requirements?**

The International Science and Engineering Foundation programme (ISEFP) is suitable for international students with qualifications up to AS-level/Year 12 or equivalent, i.e. students who have not completed A-level in their home countries or in the UK.

You will need to provide transcripts (official report/certificate of grades or percentages) from one of the following:

- International High School Diploma, or an equivalent diploma for the final year of schooling in your country, including mathematics in your final year. Please email isefpadmissions@qmul.ac.uk to enquire about specific entry requirements.

We consider every application on its individual merits and will take into consideration your individual educational experiences and context.

**How will the quality of the programme be managed and enhanced? How do we listen to and act on your feedback?**

The Student-Staff Liaison Committee (SSLC) provides a formal means of communication and discussion between the School and its students. The committee consists of student representatives from each year in the School, together with appropriate representation from staff within the School. It is designed to respond to the needs of students, as well as act as a forum for discussing programme and module developments. The Student-Staff Liaison Committees meets regularly throughout the year.

The Teaching & Learning Committee advises the School’s Director of Taught Programmes on all matters relating to the delivery of taught programmes at school level, including monitoring the application of relevant QM policies and reviewing proposals for module and programme approval and amendment before submission to Taught Programmes Board. Student views are incorporated in the committee’s work in a number of ways, such as through consideration of student surveys and input from the SSLC.

All schools/institutes operate an Annual Programme Review of their taught undergraduate and postgraduate provision. APR is a continuous process of reflection and action planning which is owned by those responsible for programme delivery; the main document of reference for this process is the Taught Programmes Action Plan (TPAP) which is the summary of the school/institute’s work throughout the year to monitor academic standards and to improve the student experience. Students’ views are considered in this process through analysis of the NSS and module evaluations.

**What academic support is available?**

Each student is provided with an Advisor who is their main point of contact for advice regarding academic matters and for assistance with pastoral concerns, throughout their whole programme. Students can see their advisors in their office hours or arrange an appointment via email. Moreover, if and when advisors are unavailable or cannot help with a specific problem, the School has several Senior Advisors to assist with student concerns.
Programme Title: International Science and Engineering Foundation (Electronic Engineering)

The School also operates a PASS (Peer Assisted Study Support) programme for peer guidance.

How inclusive is the programme for all students, including those with disabilities?

Queen Mary has a central Disability and Dyslexia Service (DDS) that offers support for all students with disabilities, specific learning difficulties and mental health issues. The DDS supports all Queen Mary students: full-time, part-time, undergraduate, postgraduate, UK and international at all campuses and all sites.

Students can access advice, guidance and support in the following areas:
• Finding out if you have a specific learning difficulty like dyslexia
• Applying for funding through the Disabled Students’ Allowance (DSA)
• Arranging DSA assessments of need
• Special arrangements in examinations
• Accessing loaned equipment (e.g. digital recorders)
• Specialist one-to-one “study skills” tuition
• Ensuring access to course materials in alternative formats (e.g. Braille)
• Providing educational support workers (e.g. note-takers, readers, library assistants)
• Mentoring support for students with mental health issues and conditions on the autistic spectrum.

Programme-specific rules and facts

N/A

Links with employers, placement opportunities and transferable skills

Upon completion of the ISEFP and following degree programme, many Electronic Engineers are in demand in sectors including aerospace, automotive, construction, electronics, defence, petrochemicals, pharmaceuticals, transportation and telecommunications.

Recent electronic engineering graduates have been hired by:

Boots
Goldman Sachs
Network Rail

Programme Specification Approval

Person completing Programme Specification: Sarahlouise Lawrence

Person responsible for management of programme: Prof. Yue Chen

Date Programme Specification produced / amended by School / Institute Learning and Teaching Committee: 12 Jan 2021
Programme Title: International Science and Engineering Foundation (Electronic Engineering)

Date Programme Specification approved by Taught Programmes Board: 30 Apr 2021
